INSECTICIDE/MITICIDE MICROEMULSION

For Commercial Nonfood Use on:
Indoor and Outdoor Ornamentals, Greenhouses, Nurseries and Turf on Golf Courses and Sod Farms

ACTIVE INGREDIENTS:
Bifenthrin* .......................................................... 7.9%

OTHER INGREDIENTS: .......................................................... 92.1%
*Cis isomers 97% minimum; trans isomers 3% maximum.

Contains 0.67 lb active ingredient per gallon.

KEEP OUT OF REACH OF CHILDREN

CAUTION

ULTRA LOW DOSAGE THROUGH MICRON GENERATION

EPA Reg. No. 53883-165-499

NOTE: USERS OF THIS PRODUCT IN CALIFORNIA MUST BE IN POSSESSION OF STATE SPECIFIC SUPPLEMENTAL LABELING.

FIRST AID

IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15 - 20 min. Remove contact lenses, if present, after first 5 min, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 min. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: This product is a pyrethroid. If large amounts have been ingested, the stomach and intestine should be evacuated. Treatment is symptomatic and supportive. Digestible fats, oils or alcohol may increase absorption and so should be avoided.

The product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-225-3320 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing vapor or spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category C on an EPA chemical resistance category selection chart.

Applicators and other handlers (other than mixers and loaders) must wear:
- Long sleeved shirt and long pants; chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride or viton; shoes plus socks.
- Mixers and loaders must wear:
  - Long sleeved shirt and long pants; chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride or viton; shoes plus socks; protective eyewear.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

USERS SHOULD:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Remove PPE immediately after handling this product. Wash outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

USER SAFETY RECOMMENDATIONS

DO NOT USE OR CALL 800-777-8570 FOR MORE INFORMATION.

FOR AUTOMATIC SPECIMEN LABEL UPDATES, REGISTER AT WWW.WMMG.COM.

RESTRICTED USE PESTICIDE

For retail sale to and use only by certified applicators, or persons under their direct supervision and only for those uses covered by the certified applicator’s certification.

RESTRICTED USE PESTICIDE

For retail sale to and use only by certified applicators, or persons under their direct supervision and only for those uses covered by the certified applicator’s certification.
Mixture:

1. Mix well
2. Add emulsifiable concentrates
3. Mix well
4. Add liquids and flowables
5. Mix well
6. Mix well

Try reversing the order of addition or increasing the amount of water if the combination is not compatible using the above order. NOTE: After increasing the amount of water, if the mixture is found to be compatible, it is necessary to recalibrate the sprayer for a higher volume application. Do not allow mixture to stand overnight.

Maximum rates: Do not apply more than 0.2 lb AI/acre (40 fl oz of Attain Nursery CA) in a single application or per year for outdoor applications.

Resistance: When products are used repeatedly for control, some insects are known to build resistance, but this cannot be predicted. This product should conform to resistance management strategies established for the use area. Check with your local or state pest management authorities for more information.

This product, or other products with a comparable mode of action, may not provide sufficient management strategies established for the use area. Check with your local or state pest resistance, but this cannot be predicted. This product should conform to resistance management strategies established for the use area. Check with your local or state pest management authorities for more information.

Use proportional amounts of Attain Nursery CA for potting media with bulk densities not listed.

Topical Application: Mix Attain Nursery CA in 1,000 oz of water based on container size and bulk density of the potting media (see table below). Use 1 oz of the mixture, evenly distributing over the potting media surface of each container. After treatment, irrigate all treated containers with 1.5” of water. This application will provide a 6 mo certification period when used in accordance with USDA guidelines.

APPLICATION RECOMMENDATIONS – Turf (Golf Courses and Sod farms)

Do not use this product on Golf Courses and Sod Farms in Nassau County or Suffolk County, New York. In New York State, this product may NOT be applied to any grass or turf area within 100 ft of a water body (lake, pond, river, stream, wetland or drainage ditch). In New York State, do make a single repeat application of Attain Nursery CA if there are signs of renewed insect activity, but not sooner than 2 weeks after the first application.

Attain Nursery CA may be applied as a surface or subsurface treatment. To get uniform coverage when treating dense and/or long turf foliage use application volumes of up to 10 gal/1,000 sq ft. For low volume applications (< 2 gal/1,000 sq ft), the treated area should be irrigated with at least 0.25" of water immediately following treatment to ensure control of subsurface pests such as, but not limited to, mole crickets.

NOTE: This specimen label is for informational purposes only. All uses may not be approved in all states. See labeling which accompanied product for Directions for Use or call 800-777-8570 for more information. For automatic specimen label updates, register at www.wmmg.com.
application rates – turf (golf courses and sod farms)

under typical conditions, the application rates listed in the table below will provide control of the pests that are listed. during periods of pest pressure or for maximum residual control, attain nursery ca can be applied at up to 0.1 lb ai/acre (20 fl oz; 0.2 lb ai/acre or 40 fl oz for ants, imported fire ants and mole crickets).

pest | pounds ai/acre | application rate attain nursery ca
---|---|---
armyworms, cutworms, sod webworms | 0.05 | 10 fl oz/acre | 0.25 fl oz/1,000 sq ft
annual bluegrass weevil (heteropterus) (adults), ants, billbugs (adults), black turfgrass ataenius (adults), centipedes, chinch bugs, crickets, earwigs, flies (adult), grasshoppers, leafhoppers, mealybugs, millipedes, mites, mole cricket (nymphs), pillbugs, sowbugs | 0.05 - 0.1 | 10 - 20 fl oz/acre | 0.25 - 0.5 fl oz/1,000 sq ft
flies (larvae), imported fire ants, japanese beetle (adult), ticks | 0.1 | 20 fl oz/acre | 0.5 fl oz/1,000 sq ft
armyworms, cutworms, sod webworms | 0.2 | 40 fl oz/1,000 sq ft | 1 fl oz/1,000 sq ft
ants, imported fire ants, mole crickets | 0.5 fl oz/1,000 sq ft

note: a single application of 0.2 lb ai/acre (40 fl oz of attain nursery ca) may be applied once per year for larger infestations of ants, imported fire ants and mole crickets.

imported fire ants: the best control will be achieved by using broadcast treatments in combination with mound drenches. this will control present colonies along with foraging workers and newly mated fly-in queens. it is critical either to use high volume treatments or to irrigate prior to application if the soil is dry. apply 0.2 lb ai/acre (40 fl oz of attain nursery ca) when making broadcast treatments. for mound drenches, dilute 1 tsp. of attain nursery ca per gallon of water and use 1 - 2 gal of finished dilution using sufficient force to penetrate the top and allow dilution to flood ant channels. treat a 4 ft diameter around each ant mound. treatment should take place in cool weather (65 - 80°F) or in the early morning or late evening hours in order to achieve the greatest results. note: a spray rig that is calibrated to apply 0.2 lb ai/acre (40 fl oz) of attain nursery ca in 5 gal/1,000 sq ft contains the approximate dilution (1 tsp./gal) that is required for fire ant mound drenches in the spray tank.

- apply with ground application equipment only (and apply with nozzles not more than 2 ft above the turf).
- do not apply when wind conditions favor downwind drift to nearby water bodies.
- do not apply when wind velocity exceeds 10 mph.
- avoid application when wind gusts approach 10 mph.
- do not apply when a temperature inversion exists.
- apply using nozzles that provide the largest droplet size compatible with sufficient coverage.
- if rain is expected within 12 hr (or whatever time is necessary for the spray to dry), do not apply for surface feeding pests.
- do not apply by ground equipment within 25 ft of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries and commercial fish farm ponds.
- do not apply when turf areas are waterlogged or soil is saturated with water (i.e. will not accept irrigation).

storage and disposal

prohibitions: do not contaminate water, food or feed by storage or disposal.

pesticide storage: store in a cool, dry area that is inaccessible to children, pets and other animals. store concentrate only in the original container. never put diluted or concentrated attain nursery ca in containers for food or beverages. when opening containers, take appropriate care to avoid spills. securely replace lids after partial use.

spills: avoid contact with spills. keep unprotected people, pets and other animals away from spills. confine liquid spills by digging with an absorbent material such as cat litter or clay. cover spills of treated dry materials to prevent contact and dispersion. put damaged packages into a suitable container large enough to hold the entire package and be appropriately sealed. mark the holding container to identify its contents and follow disposal directions. for major spills, call 1-800-454-9900 (chemtrec).

pesticide disposal: pesticide wastes are toxic. do not contaminate water, food or feed by storage or disposal. improper disposal of excess pesticide, spray mixture or rinseate is a violation of federal law. dispose of excess or waste pesticide by use according to labeling directions, or contact your state pesticide or environmental control agency or the hazardous waste representative at the nearest epa regional office for guidance.

container disposal: triple rinse (or equivalent). then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate or if allowed by state and local authorities, by burning. if burned, stay out of smoke.

additional personal protective equipment and extended reaplication intervals requirements for greenhouse use in california

epa reg. no. 58388-165-499

directions for use restricted use pesticide

it is a violation of federal law to use this product in a manner inconsistent with its labeling.

this supplemental labeling must be in possession of all users of the product in greenhouses in california.

california specific requirements for greenhouse applicators and harvesters:

in addition to following all applicable precautionary statements on the label on the product container, the following is required for greenhouse applicators and harvesters:

greenhouse applicator: greenhouse applicators must wear a full body chemical-resistant protective suit (such as barrier laminate, butyl rubber, nitrile rubber, polyvinyl chloride or equivalent).

reaplication interval: reaplications to greenhouses must be at intervals of 30 days or longer.

greenhouse harvesters: greenhouse harvesters must wear either regular length gloves or long sleeved shirt or elbow length (gauntlet type) gloves during the 30 days following application.

please refer to container label for additional precautionary statements. follow all applicable directions, restrictions and precautions on the container label.
