DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BEFORE YOU USE	<ul style="list-style-type: none"> • When spraying the product on plants with flowers, apply during early morning or late evening, when bees are not present. • Do not spray the product into fish pools, ponds, streams, or lakes. • Remove animal feeding dishes prior to application. Keep children and pets away from treated areas until spray has dried. • Do not apply to fruits or vegetables used for food.
HOW TO USE Shake Well Before Use	This product is ready to spray. Just attach this bottle to your hose according to directions. Water automatically mixes with the concentrate as you spray.

DIRECTIONS FOR USE (cont'd)

HOW TO ATTACH & SPRAY

1. Connect your garden hose to the bottle. Be sure the blue water control valve on top of the spray nozzle is in the **OFF** position. Turn on water at faucet.
2. Twist the small, star-shaped, blue product-control button to align the flat portion with the lock tab. Push the button in to open.
3. To begin spraying, point nozzle toward the area to be treated and turn the blue water control valve to the **ON** position. Tab will be horizontal.
Spray leaves and tender new shoots. To kill insects that hide, spray the underside of the leaves. Apply until leaves are evenly coated with spray, but not dripping.
4. To stop spraying, turn the blue water control valve on top of the spray nozzle to **OFF**. To close, push in the small round button opposite the star-shaped product-control button. Turn off faucet.
5. Relieve water pressure by turning blue water control valve to the **ON** position until water slows to a drip. Turn blue water control valve back to **OFF**. Disconnect garden hose from bottle.

Gypsy Moths	Plant Bugs	
Japanese Beetles		

HOW ROSE & FLOWER INSECT KILLER WORKS
Rose & Flower Insect Killer is a totally different way to control the insects that want to destroy your prized roses, flowers and other ornamental plants. The unique two-way blend of insecticides controls current insect pest problems and prevents reinfestations for up to 30 days. The residual component is actually taken into the plant. Rain or water cannot wash off this internal protection! Insects are killed when they come into contact with the product or when they attempt to eat the plant.

FOR BEST RESULTS

- Rain or watering one hour after application will not wash away effectiveness.
- To avoid serious damage to plants, eliminate pests early in the season before they multiply. For severe infestations, repeat every 7 to 14 days as needed.

Children and pets may re-enter the treated area after the spray has dried.

NOTICE : Research and testing have determined that the "Directions For Use" are appropriate for the proper use of Bayer Advanced Garden™ Rose & Flower Insect Killer under expected conditions. The Buyer assumes responsibility for lack of performance or safety if not used according to the directions.

IMPORTANT-Directions for Storage and Disposal

STORAGE CONDITIONS

Store in original container in a cool, dry place, out of the reach of children, preferably a locked storage cabinet. Protect from freezing.

DISPOSAL

- Do not reuse empty container.
- Place in trash.

Important: It is best to use all of the product in accordance with label directions. If it is necessary to dispose of unused product, please call your local solid waste agency or you may call toll-free 1-877-229-3724 for disposal instructions. Never place unused product down any indoor or outdoor drain.
